NISSAN GREEN PROGRAM

Nissan's commitment to the environment
Nissan's environmental philosophy embraces people, vehicles and nature. In the pursuit of a sustainable mobile society, the Nissan Green Program aims to reduce the environmental impact of Nissan vehicles at every stage of the vehicle life cycle, while corporate activities address environmental challenges.

Nissan's commitment to quality: provide all customers with a consistently high level of quality. Nissan applies the standard worldwide, to ensure that all Nissan owners enjoy peace of mind for the lives of their vehicles. The approach is based on quality from the customer's perspective on three key elements: 1. The expectation of a smooth driving experience with complete peace of mind, 2. The intangible appeal of a vehicle, its power to captivate and excite, with features that capture attention and imagination, 3. The level of attentiveness and service during the sales process, and long after the sale is concluded.
